WEBINARS 25 May — 10 June 2021
CONFERENCE Tuesday 22 June 2021

Research and
Innovation

Webinar 8 June 12:00 - 14:30 CEST

At Your Service: Climate knowledge and information as enablers of climate action

Concept

This adaptation challenge topic “At your service” will focus on exploring and enhancing the use and development of climate services and climate adaptation (knowledge) platforms as enablers of climate action (adaptation, resilience and mitigation). It is intended to engage those using and developing these enablers in sharing their views, knowledge and experiences. This includes in the context of how they are and could better inform and inspire the actions needed to address today’s climate challenges and those foreseen as we move to a climate-resilient and zero-carbon future. This means giving voice to those that should have voice in addressing this challenge topic and in identifying the way forward.

This challenge topic is also intended to facilitate connections and collaborations – engaging and connecting stakeholders from practice, policy, the private sector, communities and researchers in addressing the associated challenges and opportunities that these enablers offer towards identifying and implementing action.

Intended Outputs

Through this adaptation challenge topic, we will engage the targeted audience towards identifying key messages (connections and collaborations, knowledge exchange, solutions, innovations and research) related to the roles of these enablers and their enhancement in supporting the evolving nature and scope of required action. Furthermore, the intention is to provide opportunities for participants to digest and build on the wealth of knowledge that has been developed from various efforts over the past year (Climateurope, Adaptation Modelling, KE4CAP, the Adaptation Mission, Green Deal deliberations, EU Adaptation Strategy, etc.).

Core outputs will focus on the development of key messages on the forward agenda for these enablers of climate action. Messages that are directed at enhancing the quality, relevance, legitimacy and credibility of the enablers and the knowledge and information they provide in the context of informing action and considering practice, policy and scientific relevant aspects. These messages will be taken forward for consideration in relevant forums and, in particular, during the ECCA2021 High-level event (HLE, 22nd June).

Format

This adaptation challenge topic will be explored, and key messages developed through a multi-faceted participatory programme – an engaging and inclusive programme. It is essential that the programme provides opportunities to discuss and identify both directions currently being taken and those needed to inform and stimulate future action – solution-oriented addressing the ECCA2021 themes.

The approach adopted is also intended to take advantage of the opportunities that are offered by the overall ECCA2021 format – a virtual library of pre-recorded videos, a pre-webinar engagement activity, the webinar and the HLE with time between the scheduled events providing opportunities to work as a community to further develop the key messages and allow for on-going connections and collaborative activities.

Seeking your input in advance of the webinar

Participants to provide in advance of the webinar via the B2Match messaging function their suggestions / views on:

- 1-2 suggested activities / initiatives that they believe are enhancing the use of knowledge and information as enablers of climate action; and
- 1-2 areas that require (priority / urgent) attention to support existing and evolving decisions and climate action.

Webinar 08th June 2021

12:00 ECCA2021 Promotional Video

12:05- Introduction to Adaptation Inès Alterio and Roger
12:15 Challenge Topic 'At your Service' Street

12:15- Views and perspectives from those requiring and using
12:50 knowledge and information to enable climate action

Panel members Nick Wood, Climate Policy Research P/L
Liviu Stirbat, Deputy Head of Unit, DG CLIMA
Marie Scholer, EIOPA
Pablo Suarez, Red Cross Red Crescent Climate
Centre
Maria José Sanz, JPI Climate Transdisciplinary
Advisory Board

Moderated plenary discussion and in chat

12:50- Views and perspectives from those providing and developing
13:25 knowledge and information to support climate action

Panel members Chris Hewitt, UK Met Office and Climteurope
Daniela Jacob, GERICS and Climate Service Journal
Jaroslav Mysiak, CMCC
Kim van Nieuwaal, Climate Adaptation Service and KE4CAP
Rosalind West, Adaptation Research Alliance

Moderated plenary discussion and in chat

13:35- Launch of the European Climate Data Explorer
13:40

Hans-Martin Füssel, European Environment Agency

Opportunity to ask questions and seek clarification using the chat

13:40- Seeking views on priority 'messages'
13:50

Moderator Roger Street, Environmental Change Institute,
University of Oxford

Participants to identify 1-2 activities/initiatives that they believe are enhancing the use of knowledge and information as enablers of climate action and / or 1-2 areas that require (priority / urgent) attention to support existing and evolving decisions and climate

13:50- Parallel Breakout Groups: Delving deeper into areas of
14:25 particular interest

Embedding and endorsing action research principles

Jesse DeMaria-Kinney and Sydney Church (ARA Secretariat)

ERA4CS: Results, lessons and expectations for further support of JPI Climate to climate service development

Inès Alterio and Philippe Bougeault (ANR)

<i>Frontiers of Adaptation Modelling</i>	Moderator: Jaroslav Mysiak; Rapporteur Elisa Calliari (CMCC)
<i>Establishing a European CS community – enhancing the interplay between those offering and those using climate services</i>	Nicola Golding and Stacey New (UK Met Office and Climateurope)
<i>Connecting the needs and expertise from the private actors to the broader climate service market</i>	Thanh-Tam Le (Climate-KIC) and Harilaos Loukos (The Climate Data Factory)
<i>Knowledge enablers supporting climate action and the SDGs in socio-ecological nested systems</i>	Maria José Sanz (Basque Centre for Climate Change) and Elena López-Gunn (ICATALIST)
<i>Providing reference climate service in support to climate adaptation – working with and for users</i>	Stijn Vermoote and Sam Almond, ECMWF (Copernicus)

Rapporteurs to provide a summary of the outcomes of their respective breakout group discussions which will be posted by 11th June

14:25- 14:30 Wrap-up and next steps

Moderators Roger Street, Environmental Change Institute, University of Oxford
Inès Alterio, ANR

Report back from Breakout Group sessions

11 th June 2021	Reports highlighting the key messages and discussions during the 'At your service' breakout groups to be posted
