

European Environment Agency

The European Environment Agency (EEA) is an agency of the European Union, whose task is to provide sound, independent information on the environment. The EEA aims to support sustainable development by helping to achieve significant and measurable improvement in Europe's environment, through the provision of timely, targeted, relevant and reliable information to policymaking agents and the public.

AREAS OF ACTIVITY

Climate Risks & Responses, Disaster Risk Management, Climate Services, Health Sector

SESSIONS

Wednesday, May 26, 2021

13:30 - 16:00

Climate change and health: promoting wellbeing through climate action - Champion: Kristin Aunan - Cicero

OPPORTUNITIES

PROJECT

European Climate Data Explorer

The European Climate Data Explorer provides interactive access to many climate indices and climate impact indicators for Europe based on data from the

Copernicus Climate Data Store. It is hosted on the European Climate Adaptation Platform, Climate-ADAPT. The European Climate Data Explorer is intended to support the development and implementation of European, national and subnational adaptation strategies and plans by providing easy access to reliable information about past and future climate change with direct relevance for climate-sensitive sectors. It is a concrete deliverable of the new EU Adaptation Strategy in support of the European Green Deal. The European Climate Data Explorer was developed jointly by the European Environment Agency and the Copernicus Climate Change Service (implemented by ECMWF) with the support of a consortium consisting of UKRI Science and Technologies Research Council, Wageningen Environmental Research and MARIS. Contact: Hans-Martin Fuessel
