

Government, National Public Authority / Organiser

JPI Climate

EU member state initiative collaborating to align national climate research funding programs and generate and connect state new climate knowledge to support climate policy and action <http://www.jpi-climate.eu/home>

AREAS OF ACTIVITY

Climate Modelling

Climate Services

EU Projects

Research & Development

Social Science & Humanities

SESSIONS

Tuesday, May 25, 2021

13:25 - 16:00

Financing climate adaptation: from climate proofing investments to mobilising funds for a resilient society - Champion: Giulia Galluccio - CMCC

[View Session](#)

Thursday, June 10, 2021

13:30 - 16:00

Building back better: COVID recovery, resilience building and societal transformation - Champion: Elisabeth Worliczek - BOKU

[View Session](#)

OPPORTUNITIES

PROJECT

European Research Area for Climate Services ERA4CS Co

ERA4CS has been boosting research for Climate Services (CS), including climate adaptation, mitigation and disaster risk management, allowing regions, cities and key economic sectors to develop opportunities and strengthen Europe's leadership. Climate Services in ERA4CS are seen as driven by user demands to provide knowledge to face impacts of climate variability and change, as well as guidance both to researchers and decision-makers in policy and business. The 26 transnational projects focus on the development of a "climate information translation" layer bridging "user communities" and "climate science system". This implies the development of tools, methods, standards and quality control for reliable, qualified and tailored information required by the various field actors for smart decisions. ERA4CS mobilized 18 EU Member States and Associated Countries involving nearly 50 research performing organizations (RPOs) and the research funding organizations (RFOs) including national climate services and the various disciplines of academia, including Humanities and Social Sciences. A selection of the 26 projects are also available in the ECCA 2021 virtual library. An overview can be found here: <http://www.jpi-climate.eu/ERA4CS.activities/jointcallprojects>
