

INSERM

The overall aim of the HERA project is to set the priorities for an environment, climate and health research agenda in the EU.

AREAS OF ACTIVITY

Biodiversity, Nature-Based Solutions, Ecosystem Services, Bioeconomy, Citizen Engagement, Climate Risks & Responses, Disaster Risk Management, Data, Knowledge, Digital Services, Earth observation & Environmental Observation, Education, EU Projects, Health Sector, Policy-Making, Rural Planning, Social Science & Humanities, Transportation Sector, Urban Planning, Water Management, Climate change adaptation

PROJECT

HERA

HERA is a project to support future research on the environment and health nexus. The main aim is to build a European research agenda to face global environmental changes in a holistic, systemic and inclusive way. Research is expected to support decision-making at all levels and to help attaining the ultimate goals of protecting and improving ecosystem quality and human health. Stakeholder consultation, scientific expertise, socio-economic analyses are some of the tools used in a collaborative manner for HERA to come up with a relevant and realistic Health and Environment Research Agenda for 2020-2030.
