OPPORTUNITIES

PROJECT

BRIGAIID - BRIdging the GAp for Innovations in Disaster resilience

BRIGAIID's has achieved the following results: •Setting-up and providing structural support in testing and validating innovations, by performing tests and demonstrations for innovations that reduce impacts from floods, droughts and extreme weather. •Establishing a network of test facilities and implementation sites across Europe. •Creating a Test and Implementation Framework (TIF), which delivers a standardised methodology for an independent and scientifically robust judgment of the socio-technological effectiveness of innovations. •Delivery of a comprehensive support programme for business development and dissemination of innovations, the Market Analysis Framework (MAF+). This MAF+ helps to identify market opportunities and select business models. •Creating an online Climate Innovation Window platform <https://brigaid.eu> presenting more than 120 innovations and that can be accessed by all stakeholders. •Establishing Communities of Innovations in 8 countries. •Dissemination of all results through the website www.brigaid.eu BRIGAIID-Connect is a spin-off entity pursuing with all these activities. Contact: Roelof Moll <https://www.ecca21.eu/participants/320>
Official website of the project: <https://brigaid.eu>

Applies to

Local level, Regional level, Adaptation strategy, Platforms, websites, Extreme weather events, Demonstration activities, Climate change adaptation, Disaster risk management and reduction, Exchange of knowledge and good practices, Business development and commercialisation
